DRYGUY 2140 Travel Boot Dryer

Launch Date: June 23, 2015

Price: \$50.63

Introduction

The DRYGUY 2140 Travel Boot Dryer is a handy and effective way to dry shoes and other gear. This small dryer is made for people who are always on the go. It uses forced air movement to get rid of moisture and smells in just one to two hours. The DRYGUY 2140 is the best way to keep your boots, shoes, gloves, and other gear dry and ready to use while you're moving, hiking, or skiing. It's small, light, and foldable, so it doesn't take up much room in your luggage. It works quietly, so it won't bother other people in public places like hotel rooms or campgrounds. As little as 200W of power, the DRYGUY 2140 makes drying clothes environmentally friendly. It can dry all kinds of outdoor and sports gear because its safe, low-heat method is gentle on delicate materials. Because the dryer can be used for many things and is easy to use, anyone who wants to be comfortable on their travels should have one.

Specifications

- **Noise Level:** Low noise operation (under 55 dB), ensuring a quiet experience during use
- **Warranty:** 1-year manufacturer warranty for peace of mind
- **Brand:** DRYGUY
- **Discontinued by Manufacturer:** No
- **Item Model Number:** 2140
- **Department:** Unisex-adult

Package Includes

- 1 x DRYGUY 2140 Travel Boot Dryer
- 1 x User Manual

Features

1. **Portable and small:** The DRYGUY 2140 is made to be portable; it weighs only 1.5 pounds and can be folded up for easy storage. It's small, light, and easy to carry, so it's perfect for dried stuff while traveling. The dryer is small enough to fit in your bag or backpack without taking up too much room, so it's great for trips to the mountains or camping.
2. **Effective Drying:** The DRYGUY 2140 dries shoes, boots, gloves, and other items quickly and efficiently, using both forced air circulation and convection heat. Depending on the amount of moisture, it only takes 1-2 hours.

It's a must-have for people who are always on the go because it dries so quickly. It quickly gets rid of smells and reduces moisture, so you can go on your next outdoor trip right away.

3. **Energy-Star® certified:** The DRYGUY 2140 uses only 200W of electricity, so it dries clothes quickly and efficiently without waste. And because of this, it is a green option for people who want to save power and keep their gear dry.
4. **Flexible Use:** The DRYGUY 2140 can dry a wide range of items, such as boots, shoes, gloves, and even ski boots. Since it's made flexibly, you can use it for many outdoor activities, from hikes to skiing to just everyday life. It can also be used to dry fragile items without damaging them.
5. **Low Noise:** The DRYGUY 2140 is designed to be very quiet, so it doesn't make a lot of noise when it's working. This makes it perfect for use in hotel rooms, dorms, or camping that aren't very noisy. It's possible to dry your gear without making noise, so you can enjoy a quiet time.
6. **Temperature Control:** The dryer dries your shoes and gear safely and slowly, so it doesn't damage them. Make sure that no damage is done to your things while still drying them well. The temperature is just right for drying both plastic and leather boots without having to worry about safety.
7. The DRYGUY 2140 is designed to be convenient because the drying tubes can be adjusted to fit shoes of all sizes, from small shoes to big boots. The tubes can be stretched out and adjusted to make sure that your stuff fits perfectly. Because it's small, it's easy to store and bring with you on any trip.

8. **Forced Air + Convection Hybrid Drying System:** The DryGuy Travel Dry DX uses both forced air and standard convection drying to make a hybrid drying system that dries things much faster. The built-in fan moves fresh air over the thermal heating elements, spreading warm air through your gear to better get rid of wetness.
9. **AC/DC Power Adaptability:** The DryGuy Travel Dry DX comes with both AC and DC power adaptors, so you can use it at home or in your car. This makes it an important travel companion. Because it's so flexible, you can use it in many places, like at home, on the road, or at your hotel.
10. **Lightweight and easy to carry:** The DryGuy Travel Dry DX is very light—it only weighs 1.25 pounds—and easy to take. It fits easily into carry-on luggage or backpacks. It's the perfect thing to bring on trips, especially for outdoor lovers who need a quick way to dry off.

Usage

1. **Set-Up:** Place the dryer in a dry area, preferably indoors.
2. **Insert the Gear:** Insert boots, shoes, or gloves into the drying tubes, ensuring they fit snugly but aren't forced into place.
3. **Power On:** Plug the DRYGUY 2140 into an electrical outlet, and turn on the power.
4. **Drying Process:** Select the drying time (usually 1-2 hours). The dryer will blow warm air into the gear to dry it out.
5. **Check Dryness:** After the designated drying time, check the gear. If it's not completely dry, allow for a little extra drying time.

Care and Maintenance

- **Regular Cleaning:** After each use, wipe the dryer's exterior with a damp cloth to remove dirt or moisture.
- **Vent Maintenance:** Ensure the air vents are free of obstructions for optimal airflow. Periodically check for lint or debris buildup.
- **Storage:** When not in use, store the DRYGUY 2140 in a dry and cool location. Fold the drying tubes to save space.

- **Power Cord:** Check the power cord for any signs of wear or damage before each use. Replace the cord if necessary.

Troubleshooting

Dryer Not Turning On:

- Check if the dryer is properly plugged into a working outlet.
- Ensure the power switch is in the "ON" position.
- Verify that the dryer's power cord is not damaged.

Drying Takes Too Long:

- Ensure the gear is not overly wet. If the gear is soaked, it may require additional drying time.
- Check the air vents to ensure they are not blocked, which could reduce airflow.
- Increase the drying time or try a different drying setting if available.

Dryer Makes Excessive Noise:

- Verify that the dryer is placed on a flat, stable surface. A wobbling unit can cause additional noise.
- Check for any loose parts or debris inside the dryer.

Overheating:

- The DRYGUY 2140 has a built-in safety mechanism to prevent overheating. If overheating occurs, allow the dryer to cool down and ensure it is not placed in a confined, unventilated area.

Pros and Cons

Pros:

- A compact and portable design ideal for travel.
- Efficient drying time of 2-5 hours.
- Versatile use in both vehicles and homes.

Cons:

- May not be suitable for extremely wet footwear requiring longer drying times.
- Limited to drying one pair at a time.
